

## Bike Café

With our bicycle café, we create a mobile meeting place in Freiburg. Getting to know each other, learning from each other - can't this be wonderfully combined with a hot cup of coffee and delicious pastries?

Since summer 2021, we have been on the move in Freiburg. At various events and workshops, we create space for encounters and exchange in the city. People get to know each other, we learn from each other, barriers and prejudices are reduced, and a sense of togetherness emerges, according to the motto of Bike Bridge.

Together with former participants in our bicycle programs, we plan activities. Through their involvement in the Bike Café, women with refugee and migration experience have the opportunity to participate in qualification programs, facilitating their entry into professional life.

At our information events on health and education topics, we also inform participants about the offers of other associations and cooperation partners, thus ensuring that existing offers reach the target group.

Through events and participation in (city) festivals, we create a platform to raise awareness of the needs and concerns of our target group in the city and public.

We invite everyone who is interested in an open and respectful exchange and in new perspectives and ways of thinking. We believe that we can all learn from each other and share valuable skills and abilities with each other. Welcome!
